SUMMARY

Product Designer with 5+ years designing B2B, fintech and enterprise workflow products end to end, from discovery and problem framing to high-fidelity UI and hand-off. I turn complex business workflows into simple, consumer-grade experiences, and design AI-led features with trust, explainability and human-in-the-loop review. I have used AI in my design workflow since 2023: ChatGPT and Gemini for research and UX writing, Midjourney for visual concepts, and now Claude with the Figma MCP to build production flows on design systems.

EXPERIENCE

Delhivery Product Designer — Mar 2026 – Present · Bengaluru

- Own end-to-end design for four B2B products: DelFin (fleet-owner fintech app), JARVIS (CX ticketing platform), AXLE (freight bidding) and FMS (fleet management portals), partnering with PMs and engineers on scope, trade-offs and iterative releases.
- Replaced phone-and-paper FASTag sales with a self-serve purchase flow (RC auto-fill, multi-method KYC, wallet payment): **80% of orders** reach an active tag in-app and **95% of paid orders** do, in about **6 hours** with no sales call.
- Redesigned onboarding with a benefit-led tutorial, phone OTP login and role-based setup for owners and drivers; **98% of users** complete role selection, measured across **1,690 users** in a week of live data.
- Designed self-serve finance flows: GSTIN capture with PAN auto-fetch and live validation, bulk GST invoices so owners can claim **18% input tax credit**, and wallet-to-bank refunds raised in **under 2 minutes** without support.
- Designed GPS tracker purchase with installation booking and a live fleet dashboard, replacing a third-party app.
- Led on-site shadowing of **8 CX agents** handling **80–120 tickets a day** to find why JARVIS's new UI had low adoption; turned **14 pain points** and a heuristic audit into a ticket-detail redesign built around SLA cues and shipment facts.
- Designed an AI assistant that lets admins search, create and edit ticket-routing rules in plain language, with structured rule cards so a person verifies every AI change before it applies.
- Built **~75% of the AXLE bidding flow** with Claude and the Figma MCP, cutting time to UX review from **weeks to days**, plus a Figma plugin for on-brand illustrations, WCAG-checked across **31,768 colour tests**.

Parallel Design Studio Product Designer — Jun 2025 – Feb 2026 · Bengaluru

- Owned the end-to-end flow for an insurance management platform for one of India's top insurers, simplifying policy creation, claims and renewals.
- Led product thinking for key modules with client teams and engineers, from discovery to delivery.

Extentia – A Merkle Company UX Designer — May 2022 – Jun 2025 · Pune

- Designed data-driven enquiry management for TVS Motor serving **480K+ retail customers** a year, cutting enquiry processing time by **90%**.
- Led design strategy and execution for **10+ complex UX projects** with engineering, product managers and stakeholders, including accessible self-service kiosks for a US state health department.
- Maintained design systems and mentored junior designers; **Star Employee** 2022 and 2023 among 50–100 designers.

Ogee Studio UX Designer Intern — Dec 2021 – Apr 2022 · Santa Clara, CA (Remote)

- Designed UX and UI for enterprise products built on Salesforce and SAP for US-based clients, with interactive prototypes.

Design Consultants Architects LLP UX/UI Intern — Feb 2021 – Aug 2021 · Pune

- Designed a SaaS learning management platform; website redesigns lifted user engagement by **30–35%**.

SKILLS

Product & UX	End-to-end product design, B2B and enterprise workflows, user research with business users, usability testing, heuristic evaluation, information architecture, interaction design, prototyping, design systems, WCAG
AI	AI-led UX (human-in-the-loop, explainability, AI summaries), Claude with Figma MCP, prompt design, Figma plugin development, ChatGPT, Gemini
Domains	Fintech (payments, wallet, KYC, GST invoicing, refunds), enterprise workflows (approvals, ticket routing, configuration), logistics, insurance
Tools	Figma, FigJam, Miro, Jira, ClickUp, Axure, HTML/CSS/JS

EDUCATION & CERTIFICATION

B.Tech, Mechanical Engineering, Savitribai Phule Pune University (VIIT Pune), CGPA 8.61/10 — Jun 2018 – Jun 2022

Certified Usability Analyst (HFI-CUA), Human Factors International — Nov 2024

OTHER WORK & AI EXPLORATIONS

Designed and built end to end with AI, from idea to live product

- Mudra: live e-commerce store for graphic tees with catalogue filters, product pages, cart and order tracking.
- FoodMedi.Co: website for a clinical dietitian with online consultation booking and INR/USD pricing.
- FoodMunafa: POS and QR-ordering app for Indian restaurants with UPI payments, counter billing and a live kitchen dashboard.
